

Duck Hunt

Ah, the joys of playing Duck Hunt on the Nintendo Entertainment System: Blowing in the cartridge to make it load, turning off the lights, lowering the contrast on your TV, standing two inches away from the screen and still missing every other duck. Now you can have all of the nostalgic fun of hunting digital ducks without the hassle. Download Duck Hunt and use your mouse to blast the 8-bit feathers off of one or two ducks at a time. Ever wanted to take revenge on that smug dog who laughs at you when you miss? Now you can! Select game D and you can finally put that mangy mutt in his place. With Duck Hunt, you can have hours of retro fun on your computer, just try to resist the urge to blow on it.
