

How to Make Money Online Marketing your Product/Website

Introduction

Hello and welcome to this short guide on how you can make money online marketing your product or website. This is a very simple process, and I am explaining it in a very simple easy to understand way.

Making money online is the easiest way to make money. It does not require that you go to work and become a wage slave. All it requires is a little bit of effort on your part, and you can easily make money and support yourself without ever having to work a real job.

In this book, I am going to give you a simple process to develop and create a product or website, and then tell you how to market that product online.

In this book, I am including a list of the most active Facebook groups with the largest memberships, which are the ideal places to advertise for your product/website.

In this book, I am also including a list of over 500 blogs that have blogrolls, which make it very efficient for you to post your advertisement on them. I will explain more of this process further on.

In this book, I will also tell you how to write a short 2 to 4 paragraph advertisement for your product or website that you will use to post to the lists I am providing herein.

It took me over 1000 hours of work and effort to collect and refine this list of Facebook groups and Blog websites that I am giving you in this book. This list alone makes the book far worth the \$12.99 price. I could easily sell this book for \$99.99, and it would be worth the cost. So consider yourself to have stumbled upon a real bargain, nay, a real fortune.

Let us say that you are a very busy person, and do not have time to spend following the simple process outlined in this book? I will do it for you, for a fee of course.

I can market your product/website for you, for the price of 15 USD a day. There is no contract and you can pay me on a day to day basis. If you want to use my services for only one day, that is fine. If you want to use it for more, that is fine also. You can pay me through Paypal.

If you are interested in the above, please contact me at indianwifeservice@yahoo.com

So all bullshit aside, let us get on to it.

Create a product

The first step is you need to create a product that you can sell online.

This is where you have to use your imagination.

Here's just a few ideas off of the top of my head, but remember the possibilities of types of products are endless:

- Tennis shoes

- write an eBook (you can publish for free online using www.Lulu.com, a very easy to use website)

- Jewelry

- some particular service that you are expert in
Let's say you have studied a particular subject like family law, for example. You can create a website where you offer your services of providing legal advice for those who wish to consult you

- sell new and used electronics

- clothes

- car accessories
- DVDs and computer games
- baby toys
- sporting equipment
- unique items
- antiques
- collector's items
- cars, trucks, and automobiles

Anyway, this is just a list of stuff off of the top of my head. The possibilities for different types of products or services to sell are endless, so please use your imagination.

Create a Website to Sell your Product

Now that you have thought of a product you wish to sell, let's talk about how to create a website to sell your product on.

Most people don't know how to design professional websites, and don't know anything about HTML or other complicated and complex computer code.

There are many websites out there that provide pre-existing website designs, and they also register the URL www. domain name for you, and host your website as well. These are the easiest way to make a website.

www.iPage.com is considered the best of these sites that offered a pre-made ready made website design for you. It is the one I use, and they also register your URL www. domain name for you, and host your site as well. They do this for a very low price and it only costs you around \$30 dollars a year. I personally use this, so I can testify that they are reliable, and very easy to use also.

Another thing you can do to make money with your website is to use online ads on your website, that pay

you money per click. The best and most reliable of these types of services is www.Clicksor.com, and I personally use it.

It involves registering for free, and then placing the HTML code on your website, and then people can click on the ads and you get paid for each person that clicks on the ad.

So be sure to use that as well if you want to raise your overall profits.

Write a short advertisement for your product/website

Now this is an important step. This will determine how interested people are at first glance in your product/website. The short ad you write for your product needs to be clear, concise, and as attractive as possible.

Create a headline for your ad. If you are selling discount leather tennis shoes, then make the headline something like “High Quality Leather Tennis Shoes For Sale at Discount Price”.

Next you want to create a few bullet points.

If you are selling discount leather tennis shoes, you could write a few of the following bullet points, as an example:

- high quality foreign leather
- excellent running shoes
- full one year warranty
- etc

It is best to simply create the bullet points to highlight the high points of your product, and to use as a description as far as possible.

Once again, you must use your imagination and try to create the best advertisement that you possible can for your product. This part will make all the difference in to whether people are attracted to your product and whether it will sell or not.

If you would like, I can do this step for you, for a small fee of course. I charge 10 USD per ad that you wish me to write. You can pay me through Paypal. If you wish me to do this service for you, please contact me at indianwifeservice@yahoo.com

Marketing your Product Online

So now that you have your product and website ready, as well as have your product/website's advertisement written and ready to post, let us move onto the main gist of this eBook, how to market your product/website online.

This is the part that will require time and effort on your part if you wish to successfully sell your product/website online.

I will first explain the process I have created for the two different methods:

1. Facebook group posting
2. Blog blogroll posting

And after explaining the process, I will then post the list of Facebook groups and Blog blogroll websites.

As I already mentioned earlier, I can market your product/website for you, for the price of 15 USD a day. There is no contract and you can pay me on a day to day basis. If you want to use my services for only one day, that is fine. If you want to use it for more, that is fine also. You can pay me through Paypal.

If you are interested in my service of marketing your product/website, please contact me at indianwifeservice@yahoo.com

I assume that you already know what Facebook is and probably already have your own Facebook account.

You will want to create a second Facebook account aside from your main one, because it is quite likely that your Facebook account that you use to post the ad will be deleted after a week or two because of mass ad posting.

Now that you have a new Facebook account, log on and then start clicking and going to the links that I will provide below. You will need to click “Ask to Join Group”, and then move on to the next link.

After doing this for the whole list, after a few hours you should be a member of quite a few Facebook groups. Now take your product advertisement, post it in the message box, and send it. Go to the next group and repeat.

You will have a special Facebook page that lists all of the different groups you are a part of. It should be the following URL:

<http://www.facebook.com/bookmarks/groups>

So click on each group's name on your list, and go through each group like that until you finish. Post your product advertisement on each page and then move on to the next group on your list.

Do this twice daily, once in the morning and once in the evening, and I promise you that you will get at least 1000 extra hits a day to your website. And if you really want to push it, do this three times a day, once in the morning, once at lunch, and once in the evening.

On the next page, I will post the list of over 400 of the most active and largest Facebook groups for you to join. This list took me over 300 hours of work to collect, and is easily worth ten times the \$12.99 price you paid for this eBook.

Blog blogrolls

The second process you can use to post your product advertisement online is to use blogrolls.

A blogroll is a list of blogs that is listed on a person's blog. Usually they are listed in chronological order, so the newest posts should be at the top of the blogroll list.

Go to the blog's blogroll (usually located on the sidebar) and click on each blog individually. Then scroll down to the comments section and post your product/website's advertisement and post the comment. Then exit the present blog and move on to the next blog on the blogroll list.

Simple enough? Okay, here is the list of over 500 blogs with blogrolls that I compiled over the course of 600 hours of work. This list is easily worth its weight in gold, and is far more valuable than the mere \$12.99 price you paid for this eBook.

Blogs with Blogrolls List

How to get Paid with your Product/Website

There are a few ways of receiving payment online. Paypal is one of the easiest, most used, and most trusted methods.

How to set up a Paypal account?

1. Go to www.Paypal.com
2. Click “Sign Up” at the top
3. Choose whichever type of account you would like to use: Personal, Premier, or Business. Since we are doing a business online, Premier or Business is probably the best choice.
4. Fill out your personal info
5. You will then need to confirm your bank account with your Paypal account. The good news is, many large banks in America and Europe will have automatic confirmation, such as Bank of America and so on. If you are still having trouble trying to confirm your bank account with Paypal, consult the Help section on their website.

Conclusion

So that about concludes the book. I hope it will help you in helping make money online. Please do not copy or distribute this book, as it is copyrighted and I also need to make enough money in order to continue to distribute this book.

Thank you for reading!
