DISCLAIMER: Forex (off-exchange foreign currency futures and options or FX) trading involves substantial risk of loss and is not suitable for every investor. The value of currencies may fluctuate and investors may lose all or more than their original investments. Risks also include, but are not limited to, the potential for changing political and/or economic conditions that may substantially affect the price and/or liquidity of a currency. The impact of seasonal and geopolitical events is already factored into market prices. The leveraged nature of FX trading means that any market movement will have an equally proportional effect on your deposited funds and such may work against you as well as for you. The use of leverage can lead to large losses as well as gains. Under certain conditions you may find it impossible to liquidate a position. This can occur, for example, when a market becomes illiquid. The placement of contingent orders by you, such as “stop-loss” or “stop-limit” orders will not necessarily limit or prevent losses because market conditions may make it impossible to execute such orders. In no event should the content of this correspondence be construed as an express or implied promise or guarantee that you will profit or that losses can or will be limited in any manner whatsoever. Past results are no indication of future performance. Information contained in this correspondence is intended for informational purposes only and was obtained from sources believed to be reliable. Information is in no way guaranteed. No guarantee of any kind is implied or possible where projections of future conditions are attempted.

# The Forex Conspiracy

There is a **vast conspiracy** going on in the world of high finance right now that is almost unbelievable in scope, blocking small investors and traders like you and I from getting our fair share of a \$3 trillion dollar a day market.

That gigantic financial institution is the currency exchange market, otherwise known as the Forex (short for Foreign Exchange).

In this report, I'm going to reveal exactly what the **"Forex Conspiracy"** is all about... who the Insiders and Big Players are, and their own set of rules... how they play their game to siphon off huge amounts of cash for themselves each and every day... and what they know that ***they don't want us to find out about.***

I'll also reveal why thousands of traders are starting to catch on to the incredible profit possibilities of the Forex, and **abandoning the stock market completely.**

Finally, I'm going to tell you how I "cracked the code" for trading the Forex successfully, using a set of special formulas I've developed and used to dominate over the last 30 years in a completely different industry. *More on that later. For now...*

**Read every word carefully below, because what I've discovered I believe will generate more millionaires in the next decade than any other business or financial opportunity in history.**

I know that sounds like a pipe dream, but pay attention... because below I'm going to reveal what the **The Forex Conspiracy** is, and how 'they' are keeping you from getting your fair share of this huge cash money mountain that has been mostly controlled by a select group of Big Bank Insiders... until now.

## Who's Behind The Great Forex Conspiracy?

Before I tell you what the Forex Conspiracy is all about, let me first introduce myself.

Kind of.

Let me call myself "Forex Joe" for now. Sorry about the "cloak and dagger" approach, but I want to stay somewhat 'under the radar' for now.

The reason?

Report: The Forex Conspiracy	Page:
Organization: <b>OPTIONSUNIVERSITY</b> <b>FOREX TRADER</b>	2

Well, what I'm about to reveal is going to make me very unpopular with some of the Hedge Fund Honchos and Big Institutional Fat Cats when they find out I'm revealing how they've controlled this massive cash profit party for years, blocking us – the smaller investors and traders – out of the action and keeping all the spoils for themselves.

I know that sounds like some sort of made up “conspiracy theory” paranoia, but in this case... ***it's absolutely true.***

You see, by executing the strategies I've used successfully for 30 years in my unique “former career” (which we'll get to in a minute)... I've actually cracked their mathematical code... I've discovered the techniques, tactics and maneuvers the Big Boys use to score huge gains in the Forex, each and every day.

And the Forex Conspiracy revolves around a certain set of key “numbers” that seem almost random to the average person, but are the Keys To The Vault when it comes to trading the Forex.

The Hedge Fund Honchos and the Big Boy Institutional Investors are totally savvy to these numbers, and they know how to play them to withdraw... almost at will... ***huge wads of cash*** out of the gigantic Money Market known as the Forex.

So far, they've successfully kept these “Mathematical Numbers” hidden from the little guy (and gal) investors and traders. But like I said, I've cracked the mathematical code, and have identified how these certain math numbers work.

That means, now WE can put ourselves in the ***same position as the Fat Cats*** to extract our own stashes of cash from the Forex. Maybe on a smaller scale, but enough to make a living on, if you so desire. **Or even to create wealth from scratch.**

The math numbers are updated on a continuing basis... depending on the ebb and flow of a \$3.5 Trillion Dollar per day worldwide market playground... **that YOU can participate in, should you choose to do so.**

Like I said before, what I've discovered in how to trade the Forex using the Numbers Code known only to the Big Boys (until now) ***could easily make you a millionaire*** in the next decade, if not long before.

I consider myself to be an “Insider” now... since I'm on to ***how they play The Game*** and because

I've cracked their mathematical Forex Code. I play on the 'inside' with them, every day in the markets.. watching and trading right along side them..

You see, the Insiders play by their own sets of rules. I now know what they are, and how this Game is really played. I've discovered the secret "rules" they use. I call them my "**rules of engagement**", and the Big Boys have done *everything they can* to keep them hidden from you, the individual investor or trader.

## Forex Insiders Outraged (1998)

The Foreign Exchange Market was established in 1971 with the abolishment of fixed currency exchanges. Currencies became valued at floating rates determined by supply and demand.

The FOREX grew steadily throughout the 1980's, but with the technological advances of the 1990's FOREX grew from trading levels of \$50 billion a day to the current level of \$3.5 trillion daily.

**But a major change occurred in 1998.**

That was the year Retail Spot Forex Trading **opened up to the public**. And the Big Boy Hedge Fund Honchos and Fat Cat Institutional Bankers were not happy about that.

It meant The Game they had all to themselves since 1971 was coming to an end.

*And it got even worse for them...*

Because during that same time, a new technological innovation called **The Internet** exploded onto the scene. Technology advanced faster in the 1990's than in the entire century before.

That meant for the first time, online retail Forex trading became practical. Certain trading companies quickly created Internet-based Forex trading platforms to provide a way for individuals to buy and sell on the Spot Forex market.

*And... at first... The Insiders were not too worried...*

That's because these Internet-based market makers would take the opposite side of retail trader's trades (*otherwise known as "dumb money"*).

That 1998-2001 time period kicked off the massive stampede process that has evolved into today.

Report: The Forex Conspiracy	Page:
Organization: <b>OPTIONSUNIVERSITY</b> <b>FOREX TRADER</b>	<b>4</b>

Back in those “old days”, the wild, wild, west was born as gunslinger traders with aspirations of quick and easy profits lined up to grab their piece of the pie.

And the Internet-based market makers and trading firms *easily seduced* these “pie-in-the-sky”, get rich quick trading junkies with leverage capabilities of 200:1. 300:1... even **400:1!**

Needless to say, thousands of these duped traders quickly *crashed and burned*... never to enter the Forex trading market again.

So... for a while at least... the Forex Insiders breathed a collective sigh of relief. It seemed that even though they did not have complete control of The Game any longer, most of the smaller traders and investors were just **too stupid (or greedy)** to bother to learn how Forex trading really works. Their Forex Code was safe for a little while longer.

And most of the “burned out” Forex trader wannabee’s then turned to the stock market...

## Why Forex Insiders Want You Using 'Traditional' Trading Methods

Along with the vast technological advances of the 1990’s like the Internet, more and more sophisticated tools, trading platforms and systems, and simple access to tons of financial information not available to the general public before hit the online investing and trading scene.

The more serious traders and investors spent enormous amounts of time and money in learning the “classic” tools of stock market investing... like Technical Analysis, Fundamental Analysis, Candlestick Charting, etc.

**And that suited the Forex Insiders just fine...**

You see, The Insiders play The Game by a completely different set of rules than using these mundane, “old school” trading techniques and strategies like the ones I mentioned above. They are much more sophisticated than that.

So The Insiders were perfectly content to see... once again... the smaller investor and trader waste away their time on techniques that ‘sometimes’ work, while they continued to use their secret Forex Code to extract mountains of cash from the currency markets each day.

In fact, they were overjoyed to see the “masses” convinced the stock market was the “only game in town”, since the Investment Bankers and other Insiders simply took the funds they received

for their stock market transactions, and plowed it right into the Forex, **making millions off the unsuspecting stock market “players.”** *(Remember... the Forex market dwarves the stock market... by a factor of 30 to 1!)*

Even when some of the more advanced traders tip-toed back into the Forex market, now with more confidence since they were armed with these newly learned tools of Technical Analysis, Fundamental Analysis, Candlestick Charting, etc. – **The Insiders were not concerned**, since... once again... their Forex Code could not be cracked with these ‘primitive’ systems and techniques.

In fact, they now are even to the point of “toying” with those traders who dare to intrude on The Game they dominated for so long. They will occasionally make certain moves that can be “tracked” using Technical Analysis, etc. – **sucking the masses into “sure thing” trades...** and then quickly force the market the other way just for the “fun” of it, and pocketing the unsuspecting traders’ hard-earned capital... once again.

All this is appalling, I know... but just stay with me here. **It gets better, believe me.**

But it reminds me of that great quote from bank robber Willie Sutton.

When asked why he robbed banks, he simply replied...

**“Because that’s where the money is!”**

Anyway, that’s about all I have to say about the Forex Conspiracy. It’s real, and it’s happening today.

Bottom line, here’s what The Insiders of Forex Trading don’t want you to know...

- 1. Exactly how The Game is played, and**
- 2. The Mathematical Code they use to easily extract vast sums of cash each day from the Forex market.**

I’m about to reveal both items above to you, but first let me tell you why The Insiders are about to get very worried again...

# Why Thousands Of Traders Are Fleeing The Stock Market And Flocking To Forex Trading

Traders and investors are starting to abandon the stock market for the Forex in droves.

There are *dozens* of reasons for this, but let me go over some of the most important ones...

Let's get the main reason out of the way first... because it's a shocker.

The fact is (sad but true)...

## Wall Street is almost totally corrupt!

Actually, that may not be that much of a shocker, since you're now seeing evidence of that sad fact on the nightly news just about every day.

Whether it be money manager "extraordinaire" Bernie Madoff – who "made off" with \$15 billion of investor's money in the *Ponzi Scheme of the Century*...

Or the latest 100-year old investing firm to go under (think Bear Stearns, Lehman Brothers, and others) due to the unmitigated *arrogance and greed* of the supposedly "honest beyond reproach" CEO's who were in charge of these venerable, trusted institutions...

Or some of these egotistical corporate CEO's who flew to Washington D.C. in their private jets, asking for *billions in government handouts* because they were so inept they ran their companies into the ground... and *get this*... once they got the money... paid themselves and some of their "Top Employees" millions of dollars in bonuses... *with your tax money – can you believe that?*

This *unprecedented arrogance and greed* has been partially responsible for the recent financial fiasco (although some of the blame must go to the government).

Just think about the damage they've done to you and *millions of other families* across the country...

Stocks were traditionally seen as long term investments. People bought stocks or a group of stocks in mutual funds, and waited for them to appreciate and build in their retirement accounts.

*But the Crash of 2008 brought the process to its knees.* In many cases, people have lost 50-to-75%

Report: The Forex Conspiracy	Page:
Organization: <b>OPTIONSUNIVERSITY</b> <b>FOREX TRADER</b>	7

of their portfolios and retirement accounts, even with so called 'blue chip' stocks - those having proven value over many years and many bought as the backbone of an investment portfolio.

**The Crash of 2008 has proved how skewed the current system has become.** The days of buying mutual stock funds waiting for growth may have just become a thing of the past.

The Dow reached a high of over 14,000 in 2007 and has collapsed below 8,000 since then...and now hovers in a range between 7,500 to 9,000. This is a 40% loss in a little over a year!

Estimates of the losses for those who employ the buy and hold investment strategy are currently at \$8.5 Trillion and growing. There will surely be an oversold rally at some point, ***but this mess might not be over for years to come.***

So... to put it mildly...

**Millions of stockholders have lost total confidence in the stock market!**

They've sold their holdings... at just about ANY PRICE... just to get out of what they see as a failed, corrupt system!

And don't even get me started on the rampant insider trading and manipulation that goes on each and every day in the stock market.

Sure, that's supposedly against SEC rules and regs, and you occasionally see a "high profile" person get caught and fined or put in prison for a few months (think Martha Stewart), but insider trading and stock manipulation goes on all the time. ***You just don't hear about it.***

Want proof? Just look at literally any of the hundreds of charts that show a steady uptrend in price... ***just before*** the company makes a huge news announcement and doubles in price overnight. Or the huge spike in options volume, days and hours before 'news' hits the wires.

Now, I believe eventually tons of new rules and regulations will restore investor confidence in the stock market once again... ***but that could take up to a decade or more to pass.***

In the meantime, where's all those billions of investing and trading capital going to go?

My bet is the Forex. **And it's starting to happen right now...**

# The Many Benefits Of Forex Trading Over The Stock Market

As I said, the stampede from the stock market to Forex trading has already begun. And it will only intensify from here.

That's because more and more traders and investors are discovering the *many beneficial differences* between the Forex and the stock market.

We've already talked about the simple current lack of faith and confidence in the stock market.

The causes of that are non-existent in the Forex.

For one thing, the Forex is the most massive, liquid financial market on earth. Remember, we're talking about a **\$3 – 3.5 trillion dollar a day market!** So there's simply no way anyone can “corner the market”... or even a tiny piece of it. No insider trading. No manipulation possible.

And the Forex is open 5 ½ days a week, 24/7. You can trade virtually any time of the day. Even 3:00 am, there's a market open somewhere for you to play. Compare that to the stock market – open only 6 ½ hours a day, 5 days a week.

**The leverage available with the Forex is incredible.** Compared with the maximum 2:1 leverage you can get in the stock market (established decades ago because of the Great Crash of 1929), you can get up to 400:1 leverage in the Forex! (*I don't recommend that... but more on that later*).

In the Forex, there are only 6-7 currency pairs (called The Majors) that you need concern yourself with. Compare that with at least 7,000 stocks to analyze in the stock market.

Currency pairs *always move* in the Forex, giving you many chances to make profits during the day. Compare that to the stock market, where certain stocks can “**play dead**” for months.

**There's much less random action in Forex currency pair movement.** Strong trends develop much more often, that you can ride all the way up or down with total confidence (and possibly huge profits). Compare that to certain stock charts, which resemble *the path of a drunken sailor*.

Well, I could go on and on...

But I hope you can now see why Forex trading has suddenly become the ***hottest trading vehicle on the planet*** right now, why so many traders are abandoning the stock market and trying to educate themselves on the correct Forex trading methods, and why **RIGHT NOW** could be the best time in history to learn how to trade the Forex!

Which brings me to my final subject...

Now that you know who's behind the Forex Conspiracy, and why traders and investors are dropping out of the stock market in droves to trade the Forex... let's talk more about "numbers", because they are the KEY to how I "cracked the code"...

## **How I Cracked The Forex Code... And You Can Too**

OK, let's talk about those Special Numbers so crucial to putting the odds in your favor of extracting gobs of cash from the Forex.

This gets into my "unique background", and why I think coming from that totally different perspective actually ***helped*** me break the Forex Code of The Insiders.

You see, as far back as I can remember, I've always been fascinated with numbers. In fact, lots of folks have claimed I'm ***obsessed*** by them. (Which is probably true).

Have you seen that TV show called "Numbers"?

It's about a mathematical professor genius who helps his FBI agent brother solve crimes using mathematics... usually with some sort of probability or statistical model or formula. It's a great show.

Anyway, I can relate to that mathematical genius.

Now, I'm not calling myself a genius or anything (although I HAVE been called a "Mad Scientist"), because I **eat, live and BREATHE numbers!**

And I've always loved sports too. Numbers and sports have been my passions for decades.

***It goes all the way back to my childhood...***

Even as a kid, I was able to recite *every professional baseball player's stats at will*, and then I discovered I could pick winning teams with ease. I then got hooked up with a team of professional gamblers... and got *"really educated"*... getting into their mindsets and learning the "ins and outs" of professional sports gambling.

I moved to Texas in 1981, and started my own sports analyst business. Since then, I've helped dozens of "newsworthy" professional gamblers **build their wealth**, and I've acted as a sports consultant for radio and television commentators. I also had my own radio show in the Dallas / Ft. Worth area for 20 years. I covered the Dallas Cowboys back in the early '90's – their Super Bowl years along with every round of NFL draft as expert analyst.

I started what is now the hugely popular national **Around the NFL – Fantasy Football** show in the Dallas / Ft. Worth area. I was a consultant for the NFL Draft for 16 years. I started a show in the early '90's talking about college and pro football games that eventually moved to Mark Cuban's broadcast.com data feed, and was heard on a local radio station in Dallas/Ft. Worth area, one of the TOP 5 markets in the country.

Talk about having to know numbers and stats! I covered future NFL draft picks from the time they were in high school... through their entire college football career... even to predicting *when and what round they would be drafted in the NFL*... and if they would succeed.

I had to talk numbers in College & NFL Football every week... analyzing 50-to-60 College and 16 NFL games every weekend.

During that time, I spent 15-20 hours a week on LIVE broadcasts covering sports, met tons of people, and really "got down deep" into the mindset of people on "both sides of the betting fence."

With my deep knowledge of the "numbers", the gambling systems, and the gamblers' mindsets themselves, I then began to work directly with the sports-betting gamblers, teaching them how to **overcome the odds** and **develop their personal systems** to fit their own objectives and personalities, and get the "edge" they needed to win at sports betting.

I then hired a team of programmers to create software that incorporated everything mentioned above... adding in the sophisticated algorithms and number-crunching statistical analysis, coded down to data a computer can understand... and automated this whole process for finding winning sports bets each and every day.

**My Exclusive Football Power Ratings** were created from a propriety computer program that not

only evaluates the stats, explores the strengths, analyzes the pointspread and produces power rated ATS winners at an alarming rate... but the program also breaks down *every game on the College and NFL board in 39 separate and distinct categories*... with probability factor outcomes.

**I also used the same format in developing math numbers in horse racing.** The formula breaks down every horse race in 25 separate and distinct categories, and became the foundation for producing daily sheets of selections to major horse racing tracks across the nation.

To this day, I provide a sports-betting service using this automated system. My huge file of very happy subscribers proves my success in this area. I sold my horse racing numbers for a tidy sum to be used in daily reports predicting outcomes of horse races.

But then...

## **In 2001, I Discovered The Forex**

And I immediately began to see similarities in the way the sports-betting market and the Forex market work. **I found my mathematical formulas worked beautifully with the Forex**, and with a few tweaks in trending markets vs. oscillating markets, they worked equally as well. I then developed an “**exponential growth**” **bankroll theory** for the Forex much like the one that worked like gangbusters in the sports betting market.

I have made a living by using mathematical numbers in sports for 30 years. My point here is that ***I have more experience than just about anyone*** using these math numbers in Forex, and I’ve performed extensive back testing of my methods on Forex currency pairs over the years.

**Yet, I still wasn’t satisfied.**

So I spent hundreds more hours in testing, tweaking and perfecting mathematical systems to create numbers that people can **physically see ahead of time**, and not have to rely on and try to analyze any “old school” techniques like Technical Analysis and Candlesticks. (those are “lagging” systems. My **Bias and Key Numbers** – I’ll explain these in a minute – are the **Forex Math Code Breakers** – because they *predict when changes are about to occur, and possibly huge profits can be made*).

**By the way, I alluded to another part of the Forex Conspiracy above.**

Let me explain...

You simply can't "crack the code" by doing what everyone else is doing. Like using those "old school" techniques I mentioned above... such as classical Technical Analysis, Fundamental Analysis, Candlestick Charting, etc.

Remember, that's what the Forex Code Insiders *want you to keep doing*.

Now, I'm not saying those tools are useless. Not at all.

What I'm saying is that these tools and techniques are useful *after the fact*... They can be used to test the validity of our Bias and Key Numbers.

But the fact is...

**I didn't use a single one of those tools to crack the Forex Code.**

For one thing, I didn't know how to use them at the time. (I'm looking at them now, just because lots of other traders use them, understand what they mean, and I'm better able to explain my unique concepts with them).

And... in my opinion... part of the Forex Conspiracy is this... while *everyone else* is trying to figure out how to trade the Forex (and discern what the Hedge Fund Honchos are up to) with these "old school" tools, the Big Boys are merrily going their own way... *with their own set of rules and their Forex Code Numbers only they know about*.

But... as I stated above... without using one bit of Technical or Fundamental Analysis, Candlestick Charting, or any of the myriad of other devices traders typically use to "divine" trade entry and exit points, etc....

## I cracked the Forex Code... simply through massive number-crunching.

Now, I don't want to make this sound simplistic... because believe me... it was not!

The "number-crunching" involved in these calculations would keep most people busy for weeks, just trying to decipher what's going on.

In fact, here's a shot of a typical Probability Factor Spreadsheet I use to generate my Forex-beating numbers each day:

**\* Note: These Bias and Key numbers above are NOT current market. These are shown for example purposes only.**

Now, don't get blown away with how complex this looks. You won't be doing any of these calculations yourself. But those Bias and Key numbers you see above are part of the hidden Forex Code, and are the *same numbers* I'm convinced the Forex Insiders use on a daily basis to trade and make millions in the Forex markets.

More on that later, but for now...

# Bias Numbers, Key Numbers, And The Keys To Unlocking The Forex Bank Vault

*OK, this is where it starts to get even more exciting...*

All along, I've been talking about certain Special Numbers being the keys to possibly making a ton of money from the Forex.

And I mentioned Bias and Key Numbers in passing. Let me explain what these are, and why they are the Keys to the Forex Bank Vault.

Now, this could get amazingly complex, but I'll try to explain how it all works so anyone can understand.

Let's go back to a sports analogy...

In my 30-plus years of number-crunching sports statistics, in an attempt to create that "edge" you need to win (which I did), I came up with two *critically important* sets of numbers.

These two sets of numbers are basically what I use to **consistently beat the spread** in sports gambling. But I also discovered how to "tweak" them (just a little) to make them work for the Forex currency trading market as well.

Here's how they work in sports betting...

As an example, let's take professional football. And let's say I like Dallas over Seattle, and Dallas is a favorite by 12. But Dallas ends up winning 34 to 9. That event may create a statistical "edge" I can use in the near future. So I attach a "star rating" to that game result number pair (actually, the software I had written does it for me).

This software keeps track of the "star ratings" (or the statistically important pieces of data) for every team pairing in the NFL, and creates the two sets of numbers for me.

Based on the number and strength of the "star ratings", I end up with either **"Key" numbers**, which require certain "rules" to create a small betting edge for me. But even stronger than Key numbers are **"Bias" numbers**. The Bias numbers can put the odds totally in your favor.

Why is that?

It's because when my Key numbers... and especially my Bias numbers... are totally out of whack with the spread that week... it's almost ***always money in the bank for that bet!***

I call that an “**aberration**”... and that's when I “back up the truck” and recommend betting to the max. And I usually cause **big bankroll increases** that week for many of my happy clients.

Now... how does all this relate to the Forex? Very well, actually...

That's because I discovered the basic concepts of finding “Key” numbers and “Bias” numbers for the different Forex trading pairs are ***almost exactly the same*** as finding the numbers for College and NFL pro football team pairings!

**OK, that did sound a little too complicated. Let me try to make it easier to understand...**

Back to professional football. All I do is look at certain pairings (e.g. Dallas / Seattle) and look out for certain ‘flags’ in the scoreline which tell me I could make a great deal of money next time they play. I don't actually do the work for this by the way – **my program does it all for me.**

Next time those two teams play and odds are posted on the game, my computer flags me to make a bet – which I do... **with the odds firmly in my favor.** It's really so easy... but of course the clever bit is in the software, which takes all the grind out of the job.

When I came to look at the FOREX, I immediately noticed that currencies are traded in pairs too (U.S. Dollar/ Japanese Yen, Euro/U.S. Dollar, etc.)... you can think of them as two teams if you like. **This is exactly what my software was designed to handle!** By tracking the movements of these pairs, my software shouts **loud and clear** when a bet should be on – just like it does for the football teams.

**This is huge.** There's not a doubt in my mind that ***large fortunes*** can be made with this little-known information and knowledge in the next few years.

Now, obviously there's not a “spread” to beat in the Forex market like there is in the sports betting arena.

You're simply betting on one currency going up and the other going down in the Forex Pair (e.g. you'll be betting for the dollar to strengthen against the pound). And in reality, **that's even better for us.** It means less “noise” and other variables to worry about. In sports, it's just like figuring out which team is going to win and which one is going to lose. There's no spread involved.

So it was almost child's play to tweak my mathematical models to work for the Forex pairs... *just as they had worked so brilliantly* for the sporting team 'pairs'.

And that leads me to the **“mathematical flaw”** I found in the Forex market, that will add greatly to the number of millionaires made in the near future.

## Here's The Mathematical Flaw I Discovered In The Forex Market...

Remember when I talked about the “aberration” that occurs so often in sports betting? The one that... once you catch it... you *“bet the farm”* on?

*Well, something very similar happens in the Forex market.*

Here's how it works...

I mentioned the “Big Players” in the Forex market above. They're the ones who want to keep this ultra-lucrative “game” to themselves. They act like the “casino”, where all the odds are always in their favor. They are the “sharks”, and we are the “minnows” in this grand game.

Remember, the “Big Players” in the Forex market are the Fat Cat International Bankers, the Central Banks, mega-wealthy institutional investors handling billions, and the Hedge Fund Honcho gunslingers also moving billions of dollars around the world each and every day.

**Can you see we're just “minnows in a shark tank” next to them?**

Folks, they control this game, and... just like the big casinos... you're just *not going to beat them or outwit them* in the long run... although just like in a casino, anyone can get lucky for a few rolls of the dice.

But here's the fun part...

*We don't need to either get lucky OR beat them.*

We can simply watch what the “sharks” do, and wait for when they “tip their hand.”

Also know that “they” can't hurt us. “Sharks” don't pay attention to “minnows”.

They're too busy looking out for bigger sharks out there (the other big banks, trading on a much larger scale than we ever will)...

We then simply follow their lead, and make the same money they are making... just on a smaller scale. They'll never notice, and we can get in and out, as many times as we want to, completely 'under the radar' of the big banks and hedge funds.

They're not interested in little guys like us.

We simply take a piece of the pie, following the major player moves in a \$3.5 Trillion Dollar a day worldwide market that never sleeps!

So how do we know when they "tip their hand"? Well, my software sorts it all out for me... and I won't bore you with the technicalities, but basically it calculates the Key and Bias numbers for all Forex Pairs, and finds those **Forex Aberrations** whenever they occur. Let's call those highly profitable windows of opportunity "**Forex Windows.**"

A Forex Window opens up for us when something happens unexpectedly in the market... *something out of the ordinary*... perhaps caused by a Big Player repositioning or profit-taking. Or a surprise retracement in the price of a Forex Pair.

Whatever it is...

## **That "Forex Window" Is The Mathematical Flaw You Can Exploit (And Profit From) In The Forex Market!**

You see, I've discovered that... whenever these "windows" open up in the Forex market... they *almost always* close quickly. That is... things get "back in sync" fairly soon.

That's right. Those Forex Windows are only open for a short time... but there's always *time enough* for us to get in and out... *and fill our pockets with money!*

So how do we discover these Forex Windows in time to exploit them? Simple.

I just set my 'software robot' to do most of the work for me... and **report back** when it finds a window! And then I "bet" accordingly.

And **THAT**, my friends, is how more millionaires will be made in the next decade (once they know how to take advantage of that mathematical flaw in the Forex), than **in any other business or financial opportunity in history!**

And I've now made that my **MISSION** for the rest of my life... showing folks how to do exactly that.

Here's a recent example of how wealth can be created quickly trading the Forex as I've described...

**Riding this particular "Gravy Train" all the way down was good for a tidy 3,709 pips!**

This chart shows the chain of events in a Euro/U.S. Dollar trade I made recently. We made money all the way down, to the tune of 3,709 pips or ‘Price Interest Points’. We made lots of “lunch money” trades along the way as well.

Even at the basic \$10 a pip and no leverage whatsoever, that sounds like a \$37,090 “Gravy Train” to me. Now, imagine if you rode that “Gravy Train” trade at a mere 10:1 leverage!

And what’s even better, you were “letting the trade ride”... which means **all emotion and fear had been taken out of the trade**. You were playing on “house” money all the way down!

**There was no risk to your account following the system.**

This is just one example of the possible results you can have in your own portfolio, once you’re in tune with the Forex Code.

Are you starting to see the potential here? I certainly hope so, because...

# It's All About The Numbers

Let's have a little fun here.

Imagine, just for a minute...

YOU... as a world-class card-counter, able to win at any Las Vegas casino blackjack table.

YOU... with the ability to go to any horse track in the country, and pick the winning horse in almost every race.

YOU... as a sports betting superstar, armed with the winning scores of all the next day's pro football games, *before they happen...*

And... after reading this report... I think you can probably tell what these exciting scenarios all have in common...

**It's all about the numbers!**

If you master the NUMBERS needed for any of the scenarios above, you could indeed make each one a reality for you.

You see, **NUMBERS DON'T LIE!**

That's one thing you can count on in this crazy world.

Stockbrokers **LIE** to you.

Politicians **LIE** to you.

TV personalities **LIE** to you.

Heck, you even **LIE** to yourself at times! (Which can be disastrous in trading!)

But in the end...

**NUMBERS DON'T LIE!**

And now, I'm about to release the exact Forex Numbers you need each and every day to help master the Grandest, Most Profitable Game in the World... **Forex Trading.**

## So What's Next?

I hope this report has intrigued you about what is going on in the financial world each and every day... *right under your nose*.

And I hope you now understand why thousands of traders are leaving the stock market, *perhaps never to return* to what they now see as a **failed, corrupt system**.

*But again, there's the good news...*

**I've cracked the Forex Code.** I'm using my own system, based on my proprietary Bias and Key Numbers and combined with my specific "Rules of Engagement" to create frequent Forex profits you might find hard to believe.

**So right about now you might be thinking 'Great...here comes the pitch...'**

But you'd be wrong. What I'd like to do is invite you to get to know me and my trading system a little bit better over the next 7 days.

You can start by trying out a Daily Report that I create each day. And let me tell you, if you use my Daily Report service properly, it might be all you need to start scoring real profits in the Forex market.

*So here's what you should do next...*

Go to this special webpage and sign up for my Daily Report for the next 7 days, and see for yourself if this service is a good fit for you.

<http://www.ouforextrader.com/7day/>

Register at that link above and **you'll have access to my proprietary Bias and Key Numbers, along with the proper Rules of Engagement**, each and every day for the next 7 days.

I'll be doing all the "work" by sending you the daily reports with all my key numbers and predictions. And I'll explain in careful detail what I'm watching, and exactly where you should be looking to place your next Forex trade!

# Is it Too Much to Ask For You to Have a Millionaire Mindset in a \$3 Trillion Dollar a Day Forex Market?

Forex is the most massive, exciting, liquid market vehicle to create wealth I've ever seen. One that will allow you to join the journey towards attaining success with significance... leaving a *legacy of substance* while fulfilling your life goals and desires.

Hopefully this is just the beginning of our relationship together, and I look forward to talking with you again soon.

Godspeed,

Forex Joe

**P.S.** Don't miss out on this opportunity to try out my Daily Report service for the next 7 days. Others are paying \$97 per month for this service, so consider this my gift to you, and a way for you to get to know me and experience my 'unique' Forex strategies.

Who knows...this might be all you need to start generating big profits in the Forex market.

Follow the link below to sign up for my Daily Report service:

DISCLAIMER: Forex (off-exchange foreign currency futures and options or FX) trading involves substantial risk of loss and is not suitable for every investor. The value of currencies may fluctuate and investors may lose all or more than their original investments. Risks also include, but are not limited to, the potential for changing political and/or economic conditions that may substantially affect the price and/or liquidity of a currency. The impact of seasonal and geopolitical events is already factored into market prices. The leveraged nature of FX trading means that any market movement will have an equally proportional effect on your deposited funds and such may work against you as well as for you. The use of leverage can lead to large losses as well as gains. Under certain conditions you may find it impossible to liquidate a position. This can occur, for example, when a market becomes illiquid. The placement of contingent orders by you, such as "stop-loss" or "stop-limit" orders will not necessarily limit or prevent losses because market conditions may make it impossible to execute such orders. In no event should the content of this correspondence be construed as an express or implied promise or guarantee that you will profit or that losses can or will be limited in any manner whatsoever. Past results are no indication of future performance. Information contained in this correspondence is intended for informational purposes only and was obtained from sources believed to be reliable.
