A Brief Overview

With the current economic status, I turned to Internet article writing online in 2010. The work is more deadline oriented and less dependent on detail than I tend toward with my own writing, which I continue on the side whenever time allows.

I proofread and edit for family and friends on everything from full informative publications to simple classwork and look forward to making it a more active career.

Work Experience

Creative Writing, also editing and proofreading, constantly since 1995

Article writing with Demand Studios since 2010

Various poetry submissions since 1995
